Her Royal Highness Princess Maha Chakri Sirindhorn (RSPG)

Local resource base work

Conscious Mindedness Nurturement Framework

Activity 8 Special Support Activities for Resource Conservation

Her Royal Highness Princess Maha Chakri Sirindhorn has some reflections on resource conservation

"...cherishing resources is actually the essence of patriotism. It is the love one has for his/her own properties. It can be nurtured through a good understanding of the local resources and the love one has towards them. If we do not know them (the resources), we would not feel related to them. In contrast, when we know what they are, how they function, we tend to admire and cherish them as if they are our very own properties and this cherishment would finally yield a plenty of benefits..." 14 August 1997 Disitalai Pavillion, Chitralada Palace

Local resource base work involves the nurturement of the conscious mindedness and the development of local resource databases.

Membership Application
for Local Resource
Databases

Local resource base work

Function

1

Management and Administration

Local authorities, communities and schools co-develop the local resource databases through the appointment of the working committee to develop such databases. The committees plan how to manage and operate the databases. The working committees implement the agreed plans. After the implementation, evaluate and analyze the performance as well as make improvement suggestions for the next period. Report the operation performance to RSPG on an annual basis.

Function

2

Operation

Task One: Protection of the Local Resources

Principles: Knowing the areas, Knowing the resources, and learn to protect them

Task Two: Exploration and Collection of the Local Resources

Principles: knowing the resources, aware of the diversity, understanding the database structure

Task Three: Replenishing and Preserving Local Resources

Principles: know how to preserve, know the equilibriums in the ecology and aware of the changes

Task Four: Conserving and Optimizing the Local Resources

Principles: knowing the capacities, aware of the value, sustainable development

Task Five: Local Resource Database Tasks

Principles: know how to relate, understand the system, learn how to share

Task Six: Support of the Conservation of Local Resources and Database Development

Principles: support, enhance, advance

Function

3

Performances

- Overall surroundings in the area are kept clean, tidy,
- verdant with agreeable atmosphere.
- The personnel are conscientious and work ethically.
- The performances of the local authorities and its personnel are well accepted by the public.

Understanding the Four Categories of Local Resources

1

Local Resources: studying the local plants

Principles: knowing local plants, aware of the diversity, know how to optimally utilize

4

Local Resources: Studying the Local Cultures and Wisdoms

Principles: knowing local cultures and wisdoms, aware of the diversity, know how to optimally utilize

2

Local Resources: studying the local animals

Principles: knowing local animals, aware of the diversity, know how to optimally utilize

3

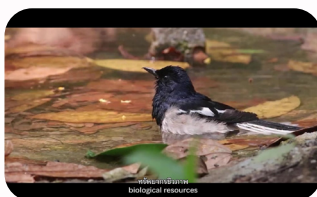

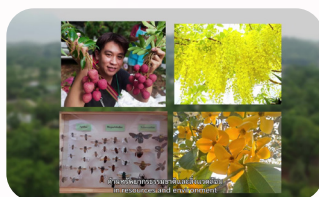

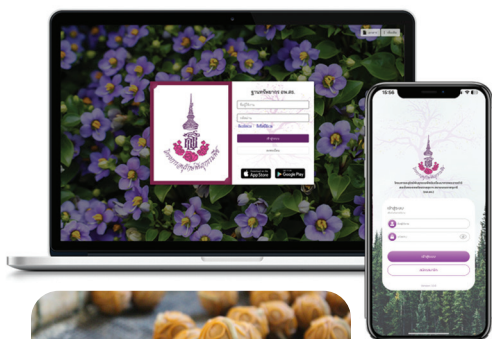

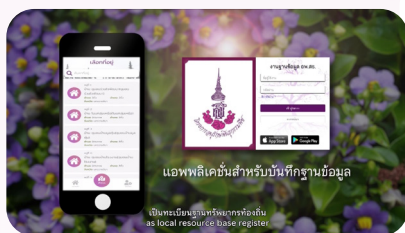

Local Resources: studying other local living things

Principles: knowing local living things, know how to optimally utilize

RSPG's Resource Database and Encyclopedia Systems

RSPG's database was created from the accumulation of the exploration data throughout the country which have constantly been verified by the concerned experts. They are useful for public authorities, general public and individuals. The database also demonstrates the geographical location of the specified resources. Resource registering from data processing allows the location of the resources in each sub-district and it would lead to the interconnection with other databases nationwide and, finally, become the national database. The information derived from the integration of data allows concerned authorities and persons to systematically and sustainably plan the resource utilization and development.

Local Resource Base Work Appraisal Criteria : ordering of RSPG's four level of certification and virtues

1. RSPG Royal Initiative Implementation Organization on Local Resource Database Work

2. RSPG Local Resource Database Certificate Level One

Certifying the organization's determination, conservation of non-living things and living things with conscious mind of the local resource database work

3. RSPG Local Resource Database Certificate Level Two

Certifying the organization's initial status of a comprehensive training bases on local resource database work

4. RSPG Local Resource Database Certificate Level Three

Certifying the organization's status of comprehensive training bases on local resource database work
